Designation: *Floating rope*

- ✓ Diameter: 8mm; Length: 18.3m / 60'
- ✓ 8 strand hollow braided
- ✓ Material: Polyethylene (HDPE)
- ✓ Breaking load: 5kN
- ✓ Max. working load: 2,5kN
- ✓ With 2pcs floating carabiners
  - o Dimensions: 80x53x23mm
  - o Material: Aluminum 7075
  - o Breaking load: 10kN
  - o Max. working load: 5kN
  - o Wire gate opening: 13mm
  - o Floating in water
  - o In pre-agreed colors
- ✓ With 2 pre-tied loops on the rope
- ✓ In pre-agreed colors

Tying a knot during a rescue is a waste of time, especially for inexperienced people. In addition, tying the floating rope is problematic, as the rope is difficult to knot due to its material. The rescue is made much easier by pre-tied loops and carabiners that attached to the ends of the rope. They provide a simple grip and quick attachment.
