

COMPLIANCE STATEMENT

for the CLS Upgrade Kit

The undersigned manufacturer hereby declares that the **CLS Upgrade Kit**:

- has been designed and manufactured in compliance with the applicable European Union legislation and general product safety requirements,
- when used as intended and under reasonably foreseeable conditions of use.

The CLS Upgrade Kit is an **accessory product** intended exclusively for use together with throwable life-saving devices (lifebuoys and horseshoe buoys) and **does not constitute a standalone life-saving appliance**.

The product:

- does **not fall under the scope of the Marine Equipment Directive (2014/90/EU)**,
- is **not subject to mandatory CE marking**,
- qualifies as a **general consumer product**, subject to the requirements of **Regulation (EU) 2023/988 on General Product Safety (GPSR)**.

In accordance with the GPSR, the manufacturer has:

- carried out a product safety and risk assessment covering the entire product life cycle,
- identified and addressed risks associated with intended and reasonably foreseeable use,
- reduced residual risks through appropriate design measures and clear warnings and instructions provided in the **Instructions for Use (IFU)**,
- ensured product traceability and adequate user information.

Any referenced standards and technical recommendations were applied **for safety assessment and design support purposes only** and not for certification or conformity assessment.

This Compliance Statement is issued based on the information available at the time of preparation and to the best knowledge of the manufacturer.
